TicketBoard

TicketBoard is a game changing product that provides a complete solution from ticketing to managing access in an event. TicketBoard is targeted more towards members groups (like clubs, associations, social groups, professional associations, religious groups, gated community etc.).

TicketBoard allows upload of members information (name, mobile number, email id and photo) and then send notifications to all for an upcoming event. Members can download the application and then after validation using an otp, can book tickets as per quote (for self, family and guests)

Money can be collected using payment gateway or list can be provided for direct debit to members' accounts.

On the day of event the organizers can validate entry of each member, family members and guests using a mobile app which scans the ticket QR code on the members' tickets (or directly displayed in the mobile app). If photos are loaded then the person who verifies will check the photo appearing on the app with the live person.

During the whole process admin dashboard will display live information about number of tickets sold in each category and also number of visitors.

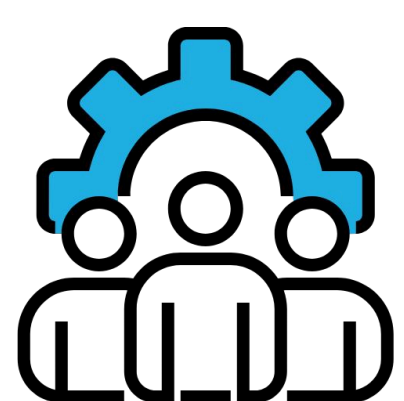

Variations can take place in tickets categories with price variations, seat numbers (using seat chart) and even displaying sponsors' advertisements in the app and electronic ticket.

Why TicketBoard?

TicketBoard transforms event management by automating processes, enhancing security, and providing real-time visibility—all while ensuring a seamless experience for both organizers and attendees.

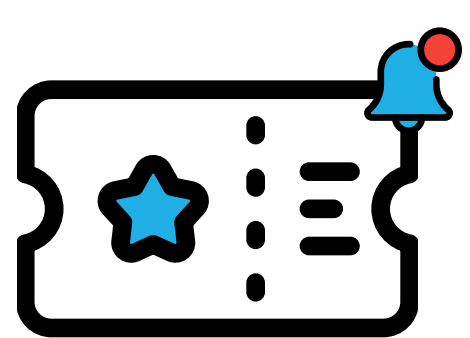

Ideal for groups seeking a modern, efficient, and scalable solution for event access control.

Key Features:

Member Management

- Easily upload member details, including name, mobile number, email ID, and photo.
- Maintain a centralized database for seamless communication and event coordination.

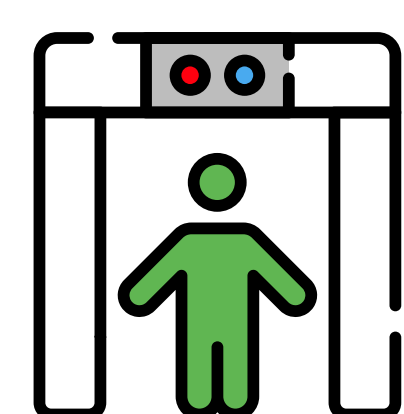

Event Notifications & Ticket Booking

- Send instant notifications to all members about upcoming events.
- Members can download the TicketBoard app, validate their identity via OTP, and book tickets for themselves, family, and guests based on allocated quotas.

Flexible Payment Options

- Secure payments via integrated payment gateways.
- Option to generate a list for direct debit from members' accounts, simplifying bulk transactions.

Effortless Event Entry Validation

- Organizers can validate attendee entry using a dedicated mobile app that scans QR codes on tickets (or displayed directly in the app).
- Photo verification ensures security by matching uploaded photos with live attendees.

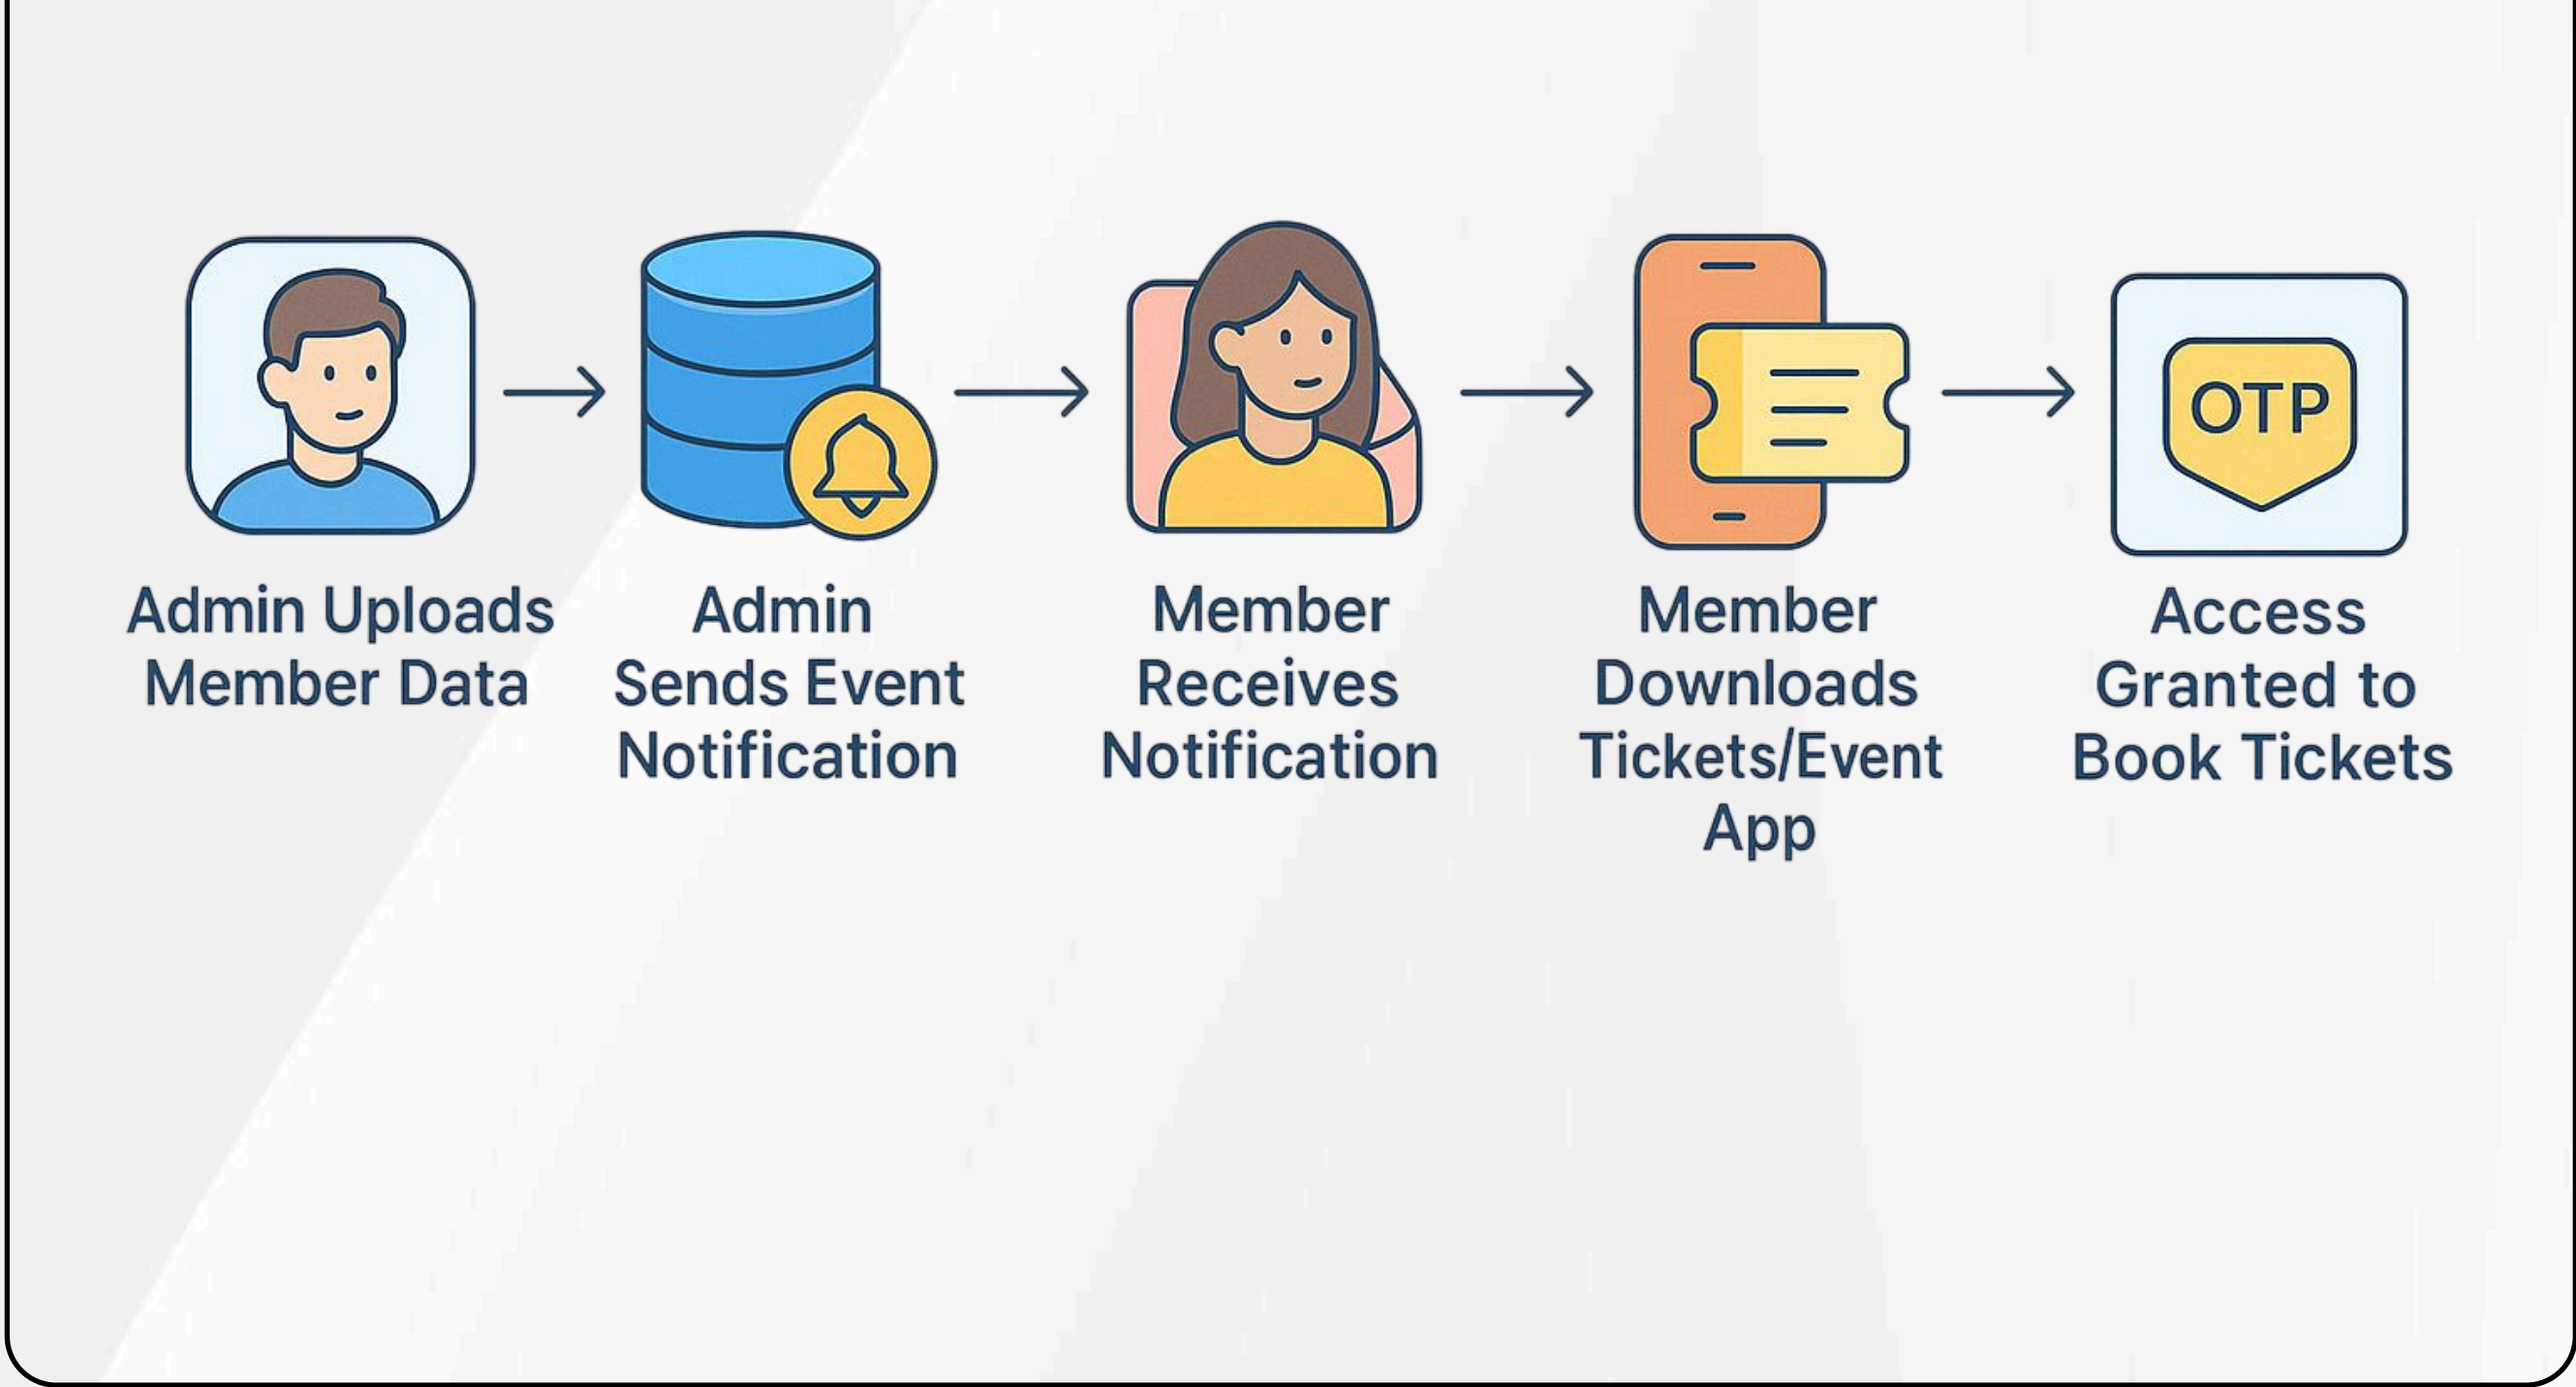

Real-Time Insights & Customization

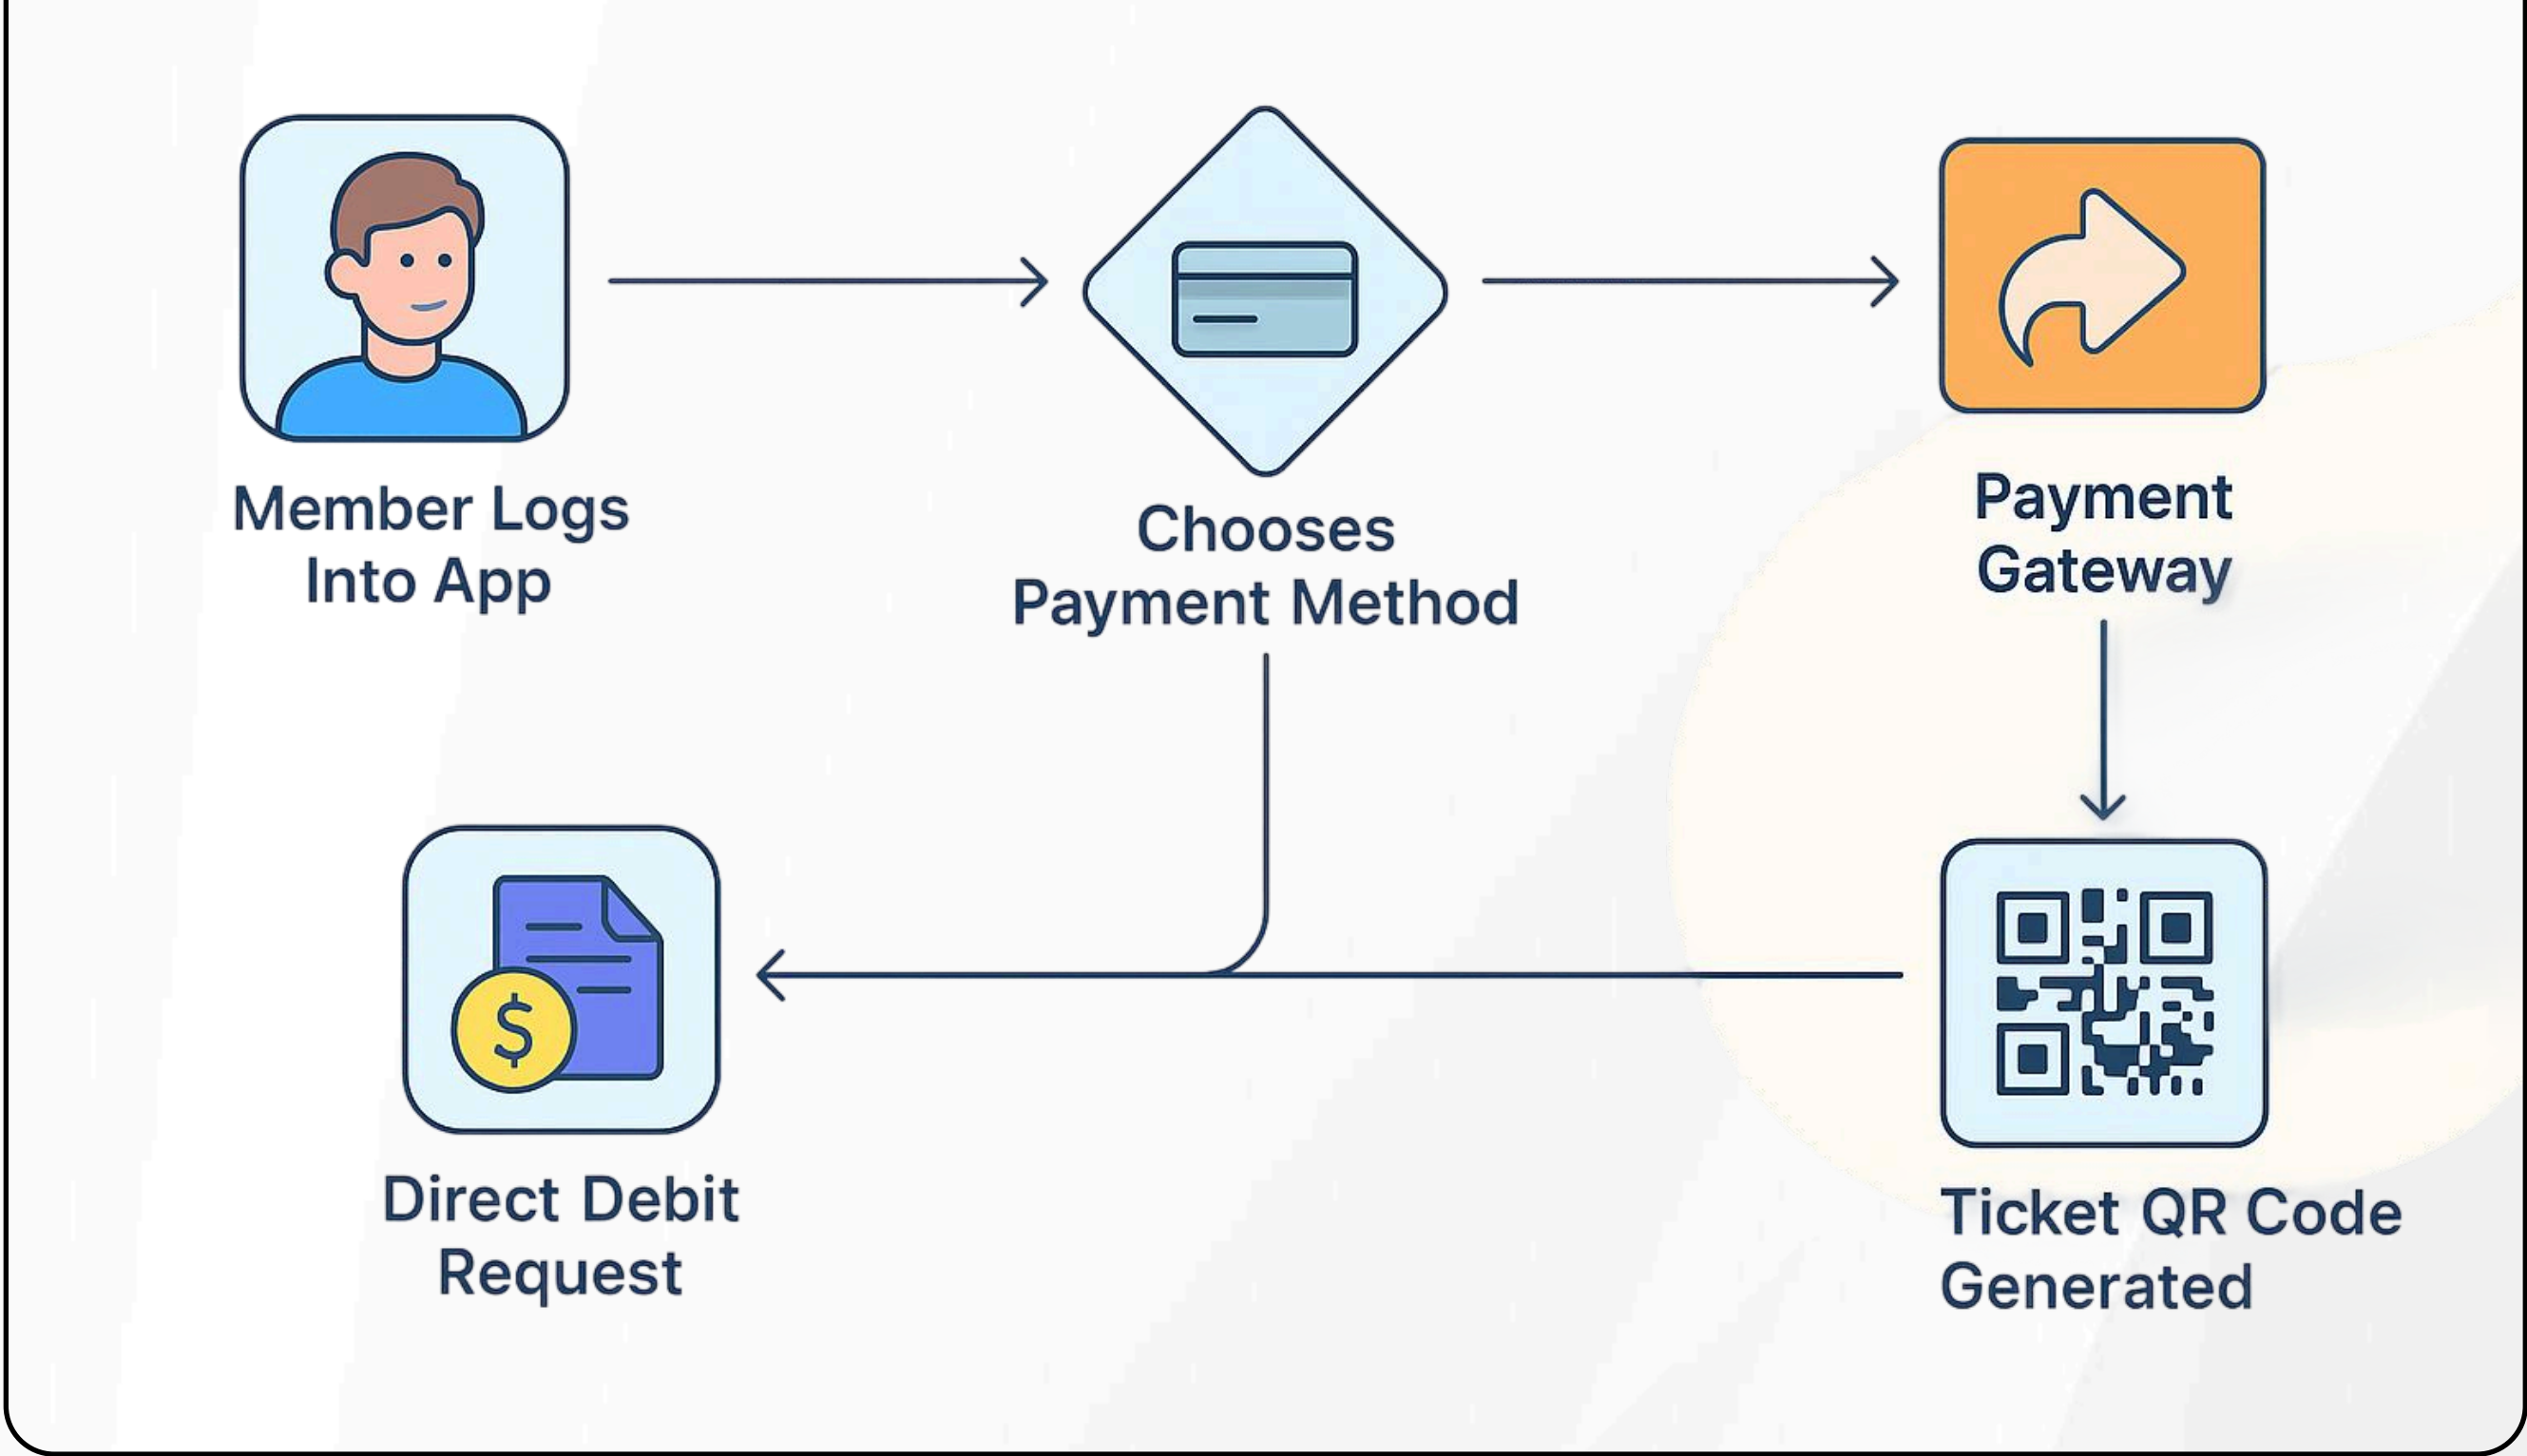

- Admin dashboard provides live updates on ticket sales per category and real-time attendance tracking.
- Customizable ticket categories with variable pricing, seat assignments (via seat charts), and sponsor advertisements displayed in the app and e-tickets.
