TM Systems

Simplifying Technology

Company and Organization

3 DECADES OF EXPERIENCE

TM Systems is a trusted **ICT consulting partner**, specialising in Software & Product Engineering, Cybersecurity, and AI solutions. We leverage AI, machine learning, and intelligent automation to accelerate software delivery, drive digital transformation, and strengthen cybersecurity frameworks.

Software & Product Engineering: Scalable, custom applications via DevSecOps.
Cybersecurity: Risk assessments, threat detection, and incident response.
AI Innovation: Predictive analytics, AI model design, and automation for actionable insights.

TM Systems empowers organisations to build secure software, mitigate risks, and unlock the full potential of data.

CLIENTS AND ORGANIZATION

With 93% client retention, we deliver high-quality, agile, innovative solutions, backed by **ISO 27001:2022** and **ISO 9001:2015** certification.

SERVICES

What We Do

DIGIAL TRANSFORMATION AND ASSESSMENT

We provide end-to-end digital transformation and assessment consulting across Strategy, Modernization, and Optimization, enabling secure and scalable evolution of Networks, Applications, and OT environments.

- **Strategy:** Digital maturity assessments, technology roadmaps, business-IT alignment, and transformation planning to define a clear path forward.
- **Modernization:** Cloud migration, legacy system upgrades, IT/OT convergence, and architecture redesign to build agile, future-ready infrastructure.
- **Optimization:** Process automation, performance benchmarking, cost efficiency reviews, and continuous improvement frameworks to maximize value.

With a transformation-first mindset, we help organizations assess current capabilities, modernize core systems, and optimize operations, ensuring sustainable growth and resilience across all layers of IT, OT, and cloud infrastructure.

What We Do

CYBERSECURITY

We provide end-to-end cyber consulting across Assessment, Compliance, and Forensics, protecting Networks, Applications, and OT environments.

- **Assessment:** Threat intelligence, vulnerability testing, penetration testing, and infrastructure/OT security reviews to uncover risks and inform defense strategies.
- **Compliance:** Framework alignment (IEC 62443, NIST, ISO 27001, GDPR, DPDPA), audits, policy development, training, and automated compliance tools.
- **Forensics:** Incident response, digital investigations, evidence preservation, and chain-of-custody management.

With a security-first mindset, we help organizations identify vulnerabilities, maintain compliance, and respond decisively to incidents, ensuring robust protection across all layers of IT, OT, and cloud infrastructure.

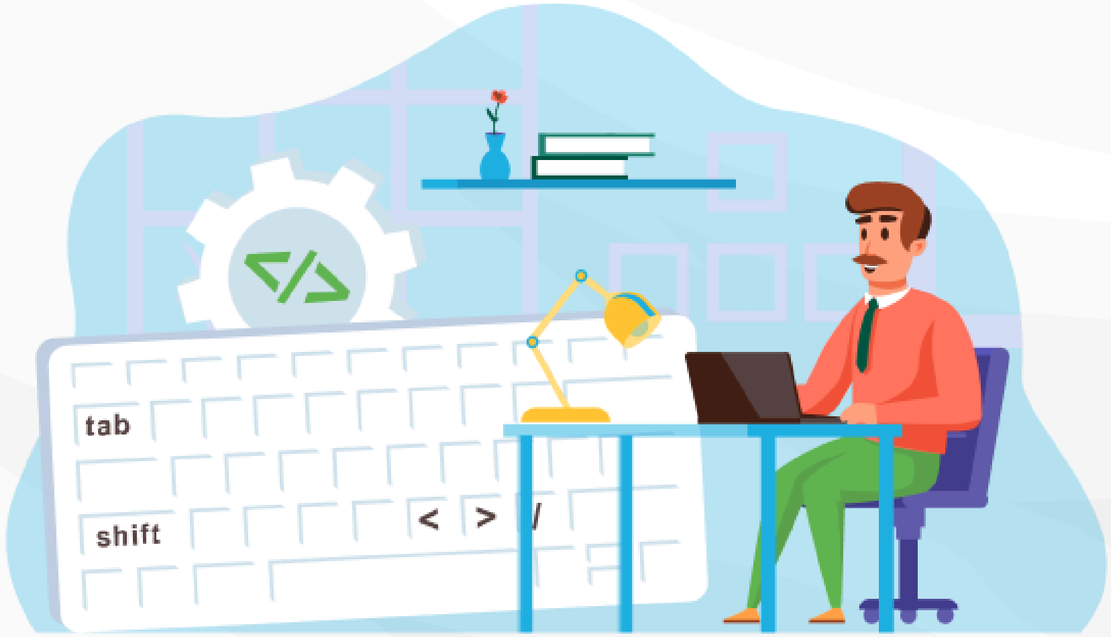

What We Do

SOFTWARE ENGINEERING

We design, build, and secure digital products that drive innovation and scale with business goals, combining human-centred design, DevSecOps, and cloud-native architecture for resilient, maintainable, and intuitive solutions.

- **Mobile Development:** Native Android/iOS apps and cross-platform solutions with Flutter and React Native.
- **Web Development:** Responsive web apps, PWAs, cloud-ready back ends, microservices, container orchestration, performance tuning, accessibility, and zero-trust security.
- **AI Solutions:** Custom models for prediction, NLP, computer vision, and intelligent automation embedded in apps.
- **IoT Engineering**: Edge-to-cloud connectivity, secure firmware, device lifecycle management, real-time analytics, dashboards, and rule-based alerting.

TM Systems delivers production-grade software that generates measurable business value—securely, at scale, on schedule.

What We Do

PROCESS OUTSOURCING

We help clients focus on strategic growth by managing critical support functions through Business Process Outsourcing (BPO) and Knowledge Process Outsourcing (KPO).

- BPO: Customer experience management, multichannel service desks, technical support, retention programs, and scalable data operations including entry, cleansing, annotation, and enrichment. Flexible engagement models reduce costs and accelerate delivery.
- KPO: Market and competitive intelligence, financial and investment research, trend analysis, valuation modeling, and BI dashboards.
- Value: Cost optimization, access to global experts, scalable capacity, and enabling internal teams to focus on core business innovation and strategic priorities.

SHOWCASE

Emergi - Ride Hailing Mobile App

Success Story: Transforming Urban Mobility in Africa with EMERGI

Location: The Netherlands / West Africa (Liberia)

Introduction
Emergi, a renewable energy start-up, is driving innovation in Africa by combining clean technology with sustainable urban mobility solutions.

Challenge

- Needed a comprehensive ride-hailing experience tailored to African cities.
- Required expertise in app development and GIS maps integration.

Our Solution

- Built two intuitive apps for drivers and passengers.
- Integrated open standards and real-time mapping for seamless mobility.

Impact

- Empowered drivers, especially women, with new income opportunities.
- Enhanced passenger experience with reliable, efficient, and affordable rides.

Compliance for Insurance Broking Firm

Success Story: IRDAI Cyber Security Compliance for Insurance Broking

Location: India

Introduction

A leading insurance broking firm sought to align its information security practices with the latest IRDAI cybersecurity guidelines.

Challenge

- No consolidated framework aligned to IRDAI mandates.
- Needed assessment without disrupting daily operations.

Our Solution

- Developed a tailored compliance assessment plan mapped to IRDAI controls.
- Conducted policy, governance, and technical reviews for full traceability.

Impact

- Identified gaps in incident response, encryption, and vendor risk management.
- Delivered a prioritized remediation roadmap and guided execution.

Network Security for a Manufacturing Unit

Success Story: Network Security Assessment for Manufacturing Company

Location: India

Introduction

A medical supplies manufacturing unit catered to sensitive medical receipes as well as medical formulations. We were approached to make sure information flow across the network was secure.

Challenge

- The network infra is a combination of legacy & modern systems.
- The assessment had to be carried out without affecting operations.

Our Solution

- System specific assessment plans were formulated and the network assessment was carried out using industry leading tools such as Nessus & Qualys.

Impact

- We were able to find out the security issues in the infrastrcture and help the IT team fix the issues.

OT Security for a Utility company

Success Story: OT security vulnerability assessment for Power Utility company

Location: India

Introduction
Power Utility company came to us with a case where they wanted to minimize the impact of cyber attacks on their network.

Challenge
- Auditing legacy protocols & live infrastructure

Our Solution
- Performed vulnerability assessment and trained the security team to perform internal security reviews as well as deal with attacks. Training was carried out using labs and simulations

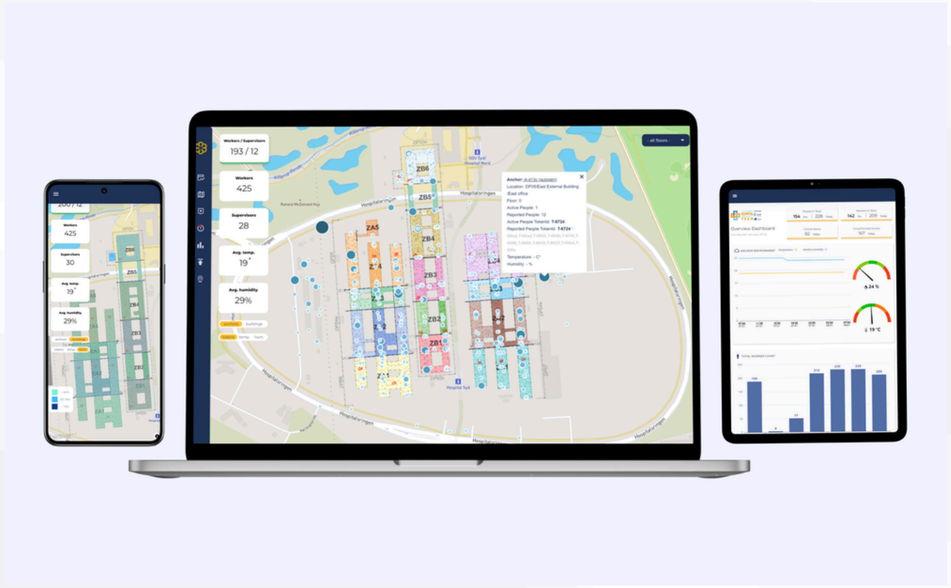

Impact
- The company understood the importance of regular assessments vis-a-vis checklist based assessment.

Asset Management software for TokenME

Success Story: Simplifying Asset Management tracking with IoT (Internet of Things) Innovation and Transformation.

Location: The Netherlands / Denmark

Introduction

Token-Me – Dutch IoT company specializing in monitoring and asset management in the construction industry

Challenge

- Needed an advanced IoT solution integrating cloud and hardware for the construction sector; required expertise in hardware, firmware, and software

Our Solution

- Delivered customizable IoT firmware in 6 months with accurate tracking; engineered a scalable AWS-based cloud platform with built-in analytics and real-time secure monitoring

Impact

- Reduced monitoring and safety costs by 40%, improved efficiency, and exceeded client expectations with user-friendly design.

Dovenmuehle Mortgage Inc

Success Story: Transforming Mortgage Business with Knowledge and Business Processes Outsourcing

Location: United States of America

Introduction

Dovenmuehle Mortgage, Inc. is a leading U.S. mortgage subservicer for lenders nationwide.

Challenge

- Dovenmuehle Mortgage, Inc. sought to transform its business processes for greater efficiency and proficiency.

Our Solution

- Over the last decade we simplified and transformed the business processes and Knowledge processes. We helped Dovenmuehle Mortgage, Inc to improve Efficiency, Productivity and Compliance by setting and managing their offshore center.

Impact

- More than 40% of Operational Efficiency
